

Let's get started!

Smart WiFi
4ft. LED Shop Light

Quick Start Guide

Get the app

Download the atomi smart app from the App Store or Google Play.

Register

Follow the on-screen instructions and register an account.

Add your smart device

Press "Add Device" or the "+" sign and choose the smart device to install from the device list.

Select the right network

Enter your WiFi password and "Confirm".

Make sure you're connected to a 2.4GHz WiFi network (atomi Smart can't connect to 5GHz networks).

Plug in your smart device

And press "Continue" on the atomi smart app.

Connect to the network

Press "Go to Connect" and follow the instructions on the screen.

Connect your smart device

Select "atomi-smart-XXXX" on the network list to connect.

If you are not automatically directed to the WiFi list, go to SETTINGS on your smartphone and press WiFi.

Troubleshooting

Smart WiFi
4ft. LED Shop Light

I can't find the atomi.smart.XXXX network in my WiFi list.

Make sure your atomi smart device is plugged in and the light is blinking quickly. If not, pull the string for 10 seconds to reboot.

My WiFi network doesn't appear in the atomi smart app.

Use your smartphone to confirm that you have at least two WiFi bars in the vicinity of your atomi smart device. If not, move your atomi smart device closer to your router. (The list will refresh every 10 seconds).

Cannot connect to my WiFi network.

Make sure that you have entered the correct WiFi password during setup. Check if there are problems with your internet connection. If the WiFi signal is too weak, reset your WiFi router and try again.

My atomi smart device appears as "Unavailable" in the app.

Refresh the device list.

My atomi smart app is frozen.

Force quit and re-launch the atomi smart app.

I just replaced my router.

To reset the WiFi without losing your atomi smart devices settings, hold down the power button and wait for the LED to change from amber to blinking white, then release.

When the LED begins to alternate white and amber, follow steps 3-5 to associate your atomi smart device with your new network.

I'm still having trouble!

WiFi networks come in a lot of shapes and sizes with many quirks of their own. It doesn't mean your atomi smart device is malfunctioning. If problems persist, please try these steps, in this order:

1. Force quit and re-launch the atomi smart app. Check to see if this fixes the issue.
2. Unplug your atomi smart device and plug it back in. Check to see if this fixes the issue.
3. Unplug your router and plug it back in. Check to see if this fixes the issue.
4. Delete and reinstall the atomi smart app. Check to see if this fixes the issue.

Inside the box you'll find

Installation

Smart WiFi 4ft. LED Shop Light

Option A: Pendant Mounted

NOTE: The unit is intended to be installed directly beneath a ceiling-mounted receptacle. If there is excess cord, bind with string or a cable tie to keep it out of work space.
IMPORTANT: Unplug the Smart Shop Light prior to mounting.

Attach the Ceiling Hooks

Choose a desired location for the light fixture, making sure it is within reach of an outlet. Use a pencil to place a mark on the ceiling where each ceiling hook (part CC) should go. Screw hooks into place until secure.

Suspended to Ceiling

1. Hook the "S" hooks (Part BB) into each of the holes on both sides of the Smart Shop Light.
2. Hook the hanging chains (Part AA) into each of the ceiling hooks (Part CC).

Option B: Surface Mounted

Attach the Ceiling Hooks

1. Drill a 1/4 inch pilot hole into the marked screw locations.
2. Insert wall anchors (Parts DD).
3. Start the wood screws (Part EE) but do not tighten fully.
4. Slide the fixture over until the narrow legs of the keyhole slots are under the heads of the wood screws (Part EE).

Secure the Fixture

Drill a 1/4 inch pilot hole nearby the fixture's receptacle. Insert wall anchors (Part DD) and tighten the wood screws (Parts EE).

Still can't connect? Need assistance?

Our friendly customer service team will work hard to put a smile back on your face. Here's how we can connect.
